

# Alcatel-Lucent VitalQIP<sup>®</sup> Workflow Manager

Streamline IP address management processes and cut administrative costs with Alcatel-Lucent's VitalQIP Workflow Manager

Easy-to-use workflow management tool helps rapidly create and implement IP address processes and policies

## BENEFITS

- Automate IP address management
- Easily adapt to changing organizational policies and processes
- Provide standardization of processes and centralized control of workflows
- Rich and growing catalog of workflows and interfaces to VitalQIP® software
- Capture "IP Domain operations" expertise into workflows for error free consistent implementation

## Streamline IP Address Management

Market-leading VitalQIP® software helps efficiently configure, automate, integrate and administer IP services across the entire network — locally or globally. This powerful management software centralizes planning and administration, enabling the rapid provisioning of address space and reliable delivery of critical IP name and services throughout the network. Compatible with multiple technologies and platforms, it helps streamline management tasks with a comprehensive suite of integrated tools and user interfaces.

## Centralized management and control of workflows

VitalQIP® Workflow Manager (WFM) software's core engine gives network administrators a graphical representation of business flows. As the VitalQIP® Workflow Manager guides the flows through the process steps (tasks) it calculates milestones/due dates for key events in the process flow. WFM tracks data as the tasks complete while monitoring and reporting on jeopardy conditions. WFM enables automated and error-free sharing of relevant data across various application interfaces such as VitalQIP® Command Line Interfaces (CLI). WFM software also provides Activity Management through a Web-based GUI, giving extensive user management capabilities, and acts as a natural flow integrator between applications.

## Rich and growing catalog of custom and pre-packaged workflows

Creating, modifying and re-using workflows is simplified with VitalQIP® Workflow Manager software's easy-to-use graphical interface. WFM software exports the output of the process design tool into an XML file, which can be easily loaded into the workflow engine for execution providing a seamless integration between process design and implementation. The Workflow

Manager Task and Interface Configurator provides a comprehensive development environment for building custom application interfaces, which can be stored and re-used.

## Summary of Features

- Pre-Packaged Workflows- Part of a growing list:
  - IP Address Management
  - Delete Subnet
  - Copy Administrator
  - Domain Management
  - RIR Management
- Pre-Packaged Application Interfaces:
  - VitalQIP® CLI commands
  - Workflow based automated tasks are included in the catalog. Task catalog will grow based on the market needs to include other VitalQIP® interfaces.
  - VitalQIP 7.0 SOAP Interface
- Hardware, OS, Database, and Software Requirements:
  - Sun® Low/Midrange servers
  - Operating System- Solaris® 9/10
  - Database- Oracle® 9.x/10x
  - Software- VitalQIP® Release 6.1 SP1/QIP6.2/QIP7.x

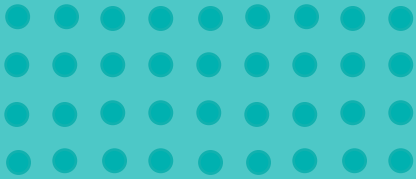

## VitalQIP® IP Management Software delivers services without boundaries

Alcatel-Lucent is a proven global provider of market leading IT management solutions that maximizes profitability and productivity and helps you leverage IT investment for a competitive advantage. Alcatel-Lucent's award-winning Vital software is used today by more than 900 customers world-wide, including over 75% of the Fortune 100.

Alcatel-Lucent leverages innovations from Bell Labs and experience and expertise from Worldwide Services to provide high performing and highly scalable solutions that increases IT staff productivity by enabling user technology and ensures network and applications performance for improved service availability. Alcatel-Lucent partners with world-class business partners, system integrators and hardware vendors to deliver proven solutions that maximize the return on your IT investments.

To learn more about these and other management solutions, contact your Alcatel-Lucent sales representative, authorized reseller or sales agent. You can also visit our web site at <http://www.alcatel-lucent.com/vital>.
