

POWERBROKER AUDITOR FOR EXCHANGE

REAL-TIME AUDITING AND COMPLIANCE REPORTING FOR EXCHANGE

Auditor for Exchange tracks and reports all changes made to all Exchange Server configurations, groups, mailbox policies, information store changes and permissions in a centralized audit log. This integrated solution provides a centralized, real-time audit database for reporting and alerting against all Exchange activity including administrators, users and non-owner mailbox access for compliance and tighter security controls. This powerful solution monitors the Exchange environment in real time - tracking the "WHO, WHAT, WHERE, WHEN" for every change.

COMPREHENSIVE CHANGE MONITORING - WHO, WHAT, WHERE, WHEN...

PowerBroker Auditor for Exchange captures all the essential information for any modification, including who made the change, when it was made and where it was made. For every event, PowerBroker captures the before and after values to clearly highlight the change. Additionally, unlike other auditing solutions, PowerBroker Auditor for Exchange provides interactive analysis with flexible, attribute level filtering and reporting, enabling administrators to more accurately and rapidly isolate users or programs that may be making inappropriate changes in your Exchange environment.

CENTRALIZED, AUTOMATED REPORTING FOR STREAMLINED COMPLIANCE

PowerBroker's advanced change monitoring capabilities help ensure that your organization is in compliance with external regulations and internal security initiatives. You can also prove to auditors that corporate policies for compliance have not deviated over time. Its built-in reporting library offers out-of-the box reporting templates, while the custom reporting wizard makes it easy to create custom reports and alerts on any Microsoft configuration, server and/or mailbox change, including flexible filtering on every attribute. With PowerBroker's zero-touch scheduled reporting, you can run reports against the central database and automatically email reports to administrators, security officers, and business data owners. In addition, BPowerBroker Auditor for Exchange translates all events into plain English.

MINIMIZE THE IMPACT OF ERRONEOUS CHANGES WITH INSTANT ALERTS

PowerBroker Auditor for Exchange enables administrators to quickly react and resolve critical changes that could affect the security or availability of your organization's Exchange email environment.

POWERBROKER MANAGEMENT SUITE: SEAMLESS LIFECYCLE-MANAGEMENT

PowerBroker Auditor for Exchange is part of the PowerBroker Management Suite,

fully integrated, end-to-end solution that seamlessly guides administrators through the entire identity and access lifecycle -

from real-time auditing of AD, File System, SQL-Server and Exchange to compliance reporting, proactive safeguards and recovery. A single dashboard provides a consolidated view for unprecedented ease and efficiency in identity and access management.

ABOUT BEYONDTRUST
